

BOOK LIST - JULY 2009

The Scottish Rock Garden Club operates a book selling function as a service to members and it is intended to be non-profit making. All the books we offer are discounted by at least 10% as a way of saying thank you for supporting us. Most of the titles on offer would be difficult to find in the High Street as we only stock specialist books.

This list in the Secretary's Pages allows for little more than the book title and author. If you think a title is interesting but are not familiar with the book you are welcome to contact me with your query and I will try to provide you with further information or a personal opinion on the book. The books are taken to most of the Scottish shows as well as Discussion Weekend and AGM so that members can browse them there.

A big bugbear is the cost of postage and there is nothing that I can do to alleviate this. The order form gives a percentage to add to the retail price of the book to cover p&xp and this seems to work pretty well in most instances. I have yet to approach a customer because the actual cost works out at much higher than that calculated and absorb small undercharges within the operation of the service.

I do regular web searches to find new titles to add to the list but always welcome outside suggestions. If you know of a new book appropriate for the SRGC list I would like to hear from you with details of the book and its publisher.

In the meantime thank you for perusing the list, happy reading!

David Shaw, Publications Manager

TITLE	AUTHOR	RRP £	Members Price £
Alpine Plants of Europe	Jum Jermyn	25:00	22:50
