

Crocus flavus flavus

Flowering Time	Spring
Distribution	Serbia; Greece; Bulgaria; Romania; NW Turkey
Native Climate	Mediterranean with continental influences
Wild Habitat	Dryish turf and thin woodland or scrub
Distinctive Features	Bright yellow flowers, sometimes with brownish exterior markings. Corm tunic membranous with fibrous point at tip
Closest Relatives	Crocus flavus dissectus
Cultivation Requirements	Warm summer, cool winter. Can tolerate moisture in summer but like all Crocus appreciates a well drained soil
Availability	Specialist bulb suppliers

At one time many named forms and varieties were cultivated but most of these are now lost to horticulture.
