

# Crocus roseoviolaceus

*Crocus roseoviolaceus* Kernd. & Pasche Stapfia 95: 2 (2011) nom. dub.

Collector(s):HKEP 0513 Locality: Pamphylia, Province Antalya, Toros Dağları, Taşeli, Yaylası, 1600-1700m

“The first of two new species described in 2011 by K. and P. - excellent new species pictured few years ago in our forum by Dave Millward. I went to search for it - and found. It was prepared for publication in September issue of The Plantsman as *C. ruksansii*, but then came June issue of STAPFIA where this new one was described as ***Crocus roseoviolaceus***. Genetic research confirmed that this *Crocus* is identical.

Pictures Janis Ruksans
