(31 year average 968.2 mm)

John Lupton, weather recorder, writes:

A year with above average rainfall but, on the plus side, only 1997 in the last 31 years had a higher average air temperature. After a slow start to the gardening year things improved and we had a very pleasant (if wet at times in August) warm summer. Remarkably, I didn't record any measurable snow cover in 2014: the first time in 31 years of recording Westhill Weather!
