

Thomas Huber : an illustrated selection of Crocus hybrids

To help everybody out there with ID of Crocus Hybrids I made some comparison pics of the most important flowers that you can buy at this time.

First the yellow Chrysanthus Hybrids and the two Flavus-Hybrids (Golden Yellow and Stellaris)

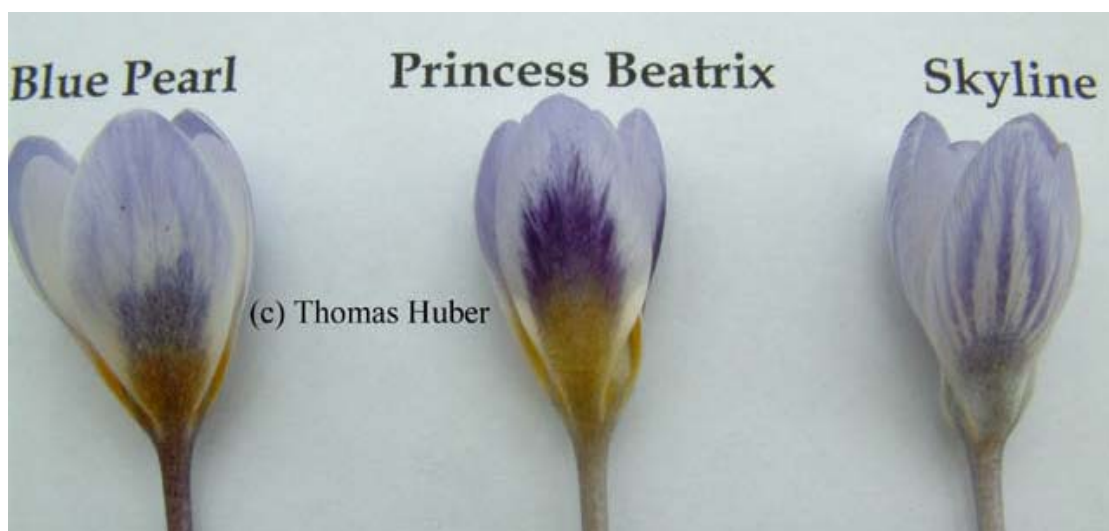

Next the pale yellow ones

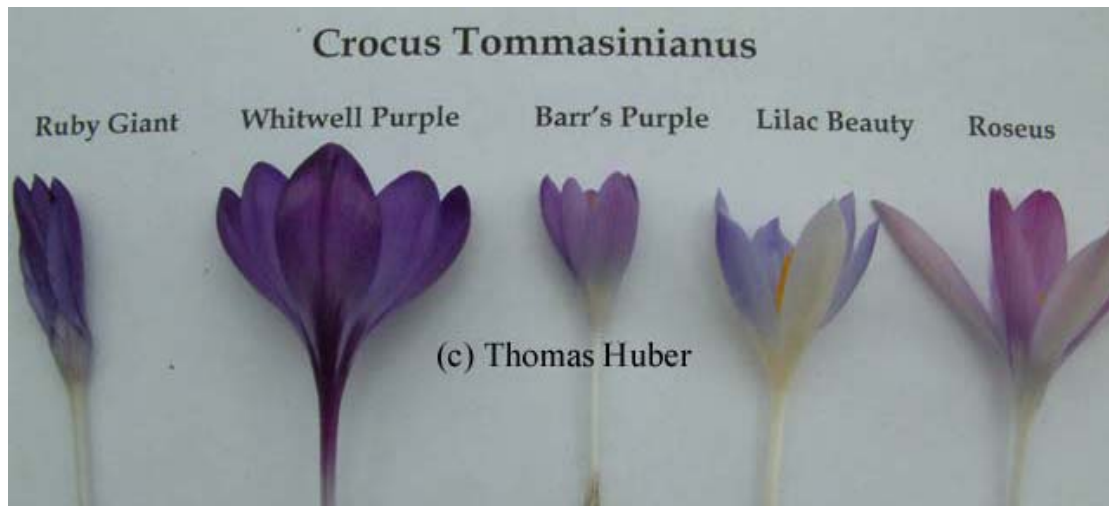

Some white ones

Biflorus-Hybrids - sold under the name of C. Chrysanthus

I forgot to mention, that my identifications were made by the best of my knowledge. But last years experiences show, that this will never be perfect and complete.

So if anybody finds a mistake, please let me know!
