

SEED, BULB & PLANTS LIST

Thank you for subscribing to the SEED LIST and in your continued interest in SimplySpecies. We have also included BULBS and PLANTS in this list as it easier to keep you apprised of everything that is currently available.

SEED

The following seeds are presently available. All are in limited quantities and are offered on a first come/first served basis. No more than one packet of each seed listed per order. Numbers in () are collection references for wild collected seed. I can give you more information on these with the seed packets or by return of e-mail if requested. Due to the increasing costs of postage, which can no longer be fully absorbed, we have been forced to increase the cost of a packet of seed to **£1.20** postage and packaging included to UK and EU destinations.
